

## Water Hardness in the British Isles

Colour	Hardness	Calcium carbonate, mg/l
Red	Hard	200+
Yellow	Medium	100-200
Green	Soft	-200

**Please note:** This map was prepared by Waterwise and is based on data from water companies. Nevertheless, it is still only a generalisation. Hardness does often vary from postcode to postcode, so please contact your water supply company for information on the specific level of hardness in your water.
