

## Waterwise Environmental Statement, April 2010

Waterwise is a UK NGO focused on decreasing water consumption in the UK and building the evidence base for large scale water efficiency. Waterwise is committed to sustainable development not only in the measures and behaviour it advocates and espouses, but also through continual improvement in reducing the environmental impacts of its own operations, projects, programmes and events.

Waterwise has identified energy consumption and transport as its two biggest environmental impacts. Waterwise is committed to the following principles:

1. Compliance with all applicable environmental regulations and the prevention of pollution
2. Sustainable Resource Consumption
2. Sustainable Waste Management
3. Sustainable Transport
4. Sustainable Procurement
5. Sustainable People and Relationships

The company is committed to reducing these and other impacts and to the continual improvement of its environmental performance, through setting targets for measurable annual improvements. It is the responsibility of all employees to fully support this policy through active participation and co-operation.

This environmental policy will be displayed at all times and is openly available to members of the public via our website - [www.waterwise.org.uk](http://www.waterwise.org.uk)

The introduction and implementation of this policy is a commitment of Waterwise management and a shared responsibility with our employees.

Waterwise will seek to apply this policy to its (co-hosted) offices beyond the London headquarters, where possible.

This policy has been adopted by the Board and is formally reviewed annually, and when offices are moved and opened. Comments are welcome.
